2024.10.16 Thursday to-do

- remove unnecessary column from cwis
    - check the database and code for it
- zip the dynamically used code 😛
- and the database as well

- Fields to be removed & used (striked removed):

  table : cwis.data_cwis

---

column	used
id	
sub_category_id	
parameter_id	y (used for param_list)
assmntmtrc_dtpnt	y (used for param_details)
unit	y (used for param_details)
co_cf	y (used for param_details)
data_value	y (used for param_details)
data_type	y (used for param_details)
sym_no	
year	y
source_id	
heading	
label	
indicator_code	
remark	y (used for param_details)
is_system_generated	y (used for param_details)

column	used
data_periodicity	y (used for param_details)
formula	
answer_type	y (used for param_details)
chart_display	

table : cwis.data_cwis

column	used
id	
category_id	
sub_category_id	y
parameter_id	y
assmntmtrc_dtpnt	y
unit	y
sym_no	
category_title	y
sub_category_title	
parameter_title	y
co_cf	
data_type	y
heading	y
label	y
indicator_code	y
parent_id	
remark	y
is_system_generated	
data_periodicity	

column	used
formula	
answer_type	y

new minimalist table

column	datatype	description
id	integer	unique identifiable number
indicator_code	varchar	includes codes like eq-1, and vice versa
label	varchar	main title of each indicator
value	varchar or integer	stores calculated for each indicator
year	varchar	stores different year
